## FREQUENTLY ASKED QUESTIONS

---

### **Do you think you can help me with my health problem?**

Our clinic uses an innovative approach to assessing and treating your health care concerns. Perhaps you have experienced being examined by your doctor, having blood tests done, x-rays or other diagnostic tests taken, only for your doctor to report back that all your tests are normal yet both you and your doctor know that you are anything but normal!. Unfortunately this experience is all too common.

Most physicians are trained to look only in specific places for the answers, using the same familiar labs or diagnostic tests. Yet, many causes of illness cannot be found in these places. The usual tests do not look for food allergies, hidden infections, environmental toxins, mold exposures, nutritional deficiencies and metabolic imbalances. New gene testing can uncover underlying genetic predispositions that can be modified through diet, lifestyle, supplements or medications.

We use a variety of innovative testing techniques and procedures to help our patients prevent illness and recover from many chronic and difficult to treat conditions. Our clinicians are highly skilled in evaluating, assessing and treating chronic problems such as fibromyalgia, fatigue syndromes, autoimmune diseases, inflammatory disorders, mood and behavior disorders, memory problems and other chronic, complex conditions. We also focus on the prevention and treatment of many effects of heart disease, diabetes, dementia, hormonal imbalances and digestive disorders. Here at our clinic we focus on the body that has the condition and not the condition itself!

### **Can all the tests I need be done at this clinic?**

Most of the testing can be performed at this clinic. Some testing can be done through conventional laboratories and others are only available through specialty laboratories. During your consultation, we will determine which tests are needed and then our office assistants can review the testing recommendations, the instructions (e.g. fasting or non-fasting, etc.) and costs. Some testing can be performed at home with test kits to collect urine, saliva or stool. Others may require you to come in to our office to have blood drawn, or go to a local laboratory to draw the blood. In all cases, we will assist you in coordinating initial and follow-up testing.

Occasionally, we may recommend certain tests that are not performed at our facility. In those instances, we can provide you with an order that you can take to a facility near your home or we can schedule an appointment to have them done near our office.

### **Do you take insurance?**

We do not accept insurance or Medicare. On some qualified Insurance Companies, we will file insurance paperwork on your behalf. For the non-qualified Insurance Companies, we will provide a detailed receipt for services performed for you to submit to your insurance carriers. Some insurance carriers may partially cover medical services and laboratory tests performed by the physicians. Payment in full by check, cash or credit card is due at the time services are provided.

### **What credit cards do you accept?**

We accept the following credit cards: MasterCard, Visa, Discover, and American Express. If you like we can maintain an active credit card on file at the office so we can bill follow-up consultations, laboratory testing, and other services.

## IMPORTANT PATIENT INFORMATION

### Patient Acceptance Policy

In order to best serve you, the *Patient Acceptance Policy* should be carefully reviewed. It is Dr. Carucci's opinion that you should be well informed on our expectations and clinical procedures. To prevent any misunderstandings or confusion on what to expect, Dr. Carucci would appreciate that you read the below steps and provide your signature. This would simply imply that you have read the *Patient Acceptance Policy* and understand what is expected of you.

#### 1. Completion of the following forms:

- The Health Questionnaires**
- The Nutritional Assessment Questionnaire** This 322 question questionnaire was developed to gather important information about your body. It will help Dr. Carucci assist in helping you. The medical questionnaire will allow Dr. Carucci to quickly “zero” in on the probable causes of your health problems.
- The Diet Diary**

It is **VERY** important for you to carefully and thoroughly complete all of these forms and questionnaires prior to your first consultation with Dr. Carucci. Once Dr. Carucci has received your completed forms, our office will schedule your first consultation

2. **Medical Records** from all physicians since you were **first diagnosed** with your health condition **MUST** be obtained prior to scheduling an appointment.
3. Once Dr. Carucci has your completed questionnaires and copies of all your medical records, a one-hour appointment will be scheduled to review your case. The cost for the one-hour appointment as well as Dr. Carucci's time for reviewing your medical questionnaire, medical records and written reports is **\$200.00**
4. Based on your scheduled appointment and review of all your medical information, it may be necessary to obtain comprehensive **blood chemistry**. The blood chemistry test will include:
  - Comprehensive Executive Metabolic Panel**, which includes 24 important disease markers such as AST, ALT, GGT, Bilirubin (Liver), BUN, Creatinine, Uric Acid (Kidney), Alkaline Phosphatase (Bone)
  - Cardiovascular Panel**: Cholesterol, Triglycerides, LDL, HDL, Cholesterol/HDL Ratio, LDL/HDL Ratio, C Reactive Protein (hs-CRP), Homocysteine, Fibrinogen, Ferritin
  - Thyroid Panel**: Total T3, Total T4, Free T3, Free T4, TSH
  - Magnesium, Vitamin D 3**
  - CBC differential**: White Blood Cells and Red Blood Cells, Platelets
  - Inflammatory markers**: Sedimentation Rate
5. Based on your medical history, questionnaire, medical records and initial consultation, it may be necessary to order additional medical laboratory tests. You will be presented with detailed information on the **specific tests recommended**. The cost for your initial Laboratory tests will be discussed at that time. **Payment can be made via check and/or credit card**. We accept MasterCard, Visa, Discover and American Express.

6. If you have not had a physical examination within the last two years or since the start of your most recent health problem, it is required to either schedule an appointment with Dr. Carucci or with your primary physician, for that physical examination.
7. The results of your lab tests may take approximately **three weeks**, at which point, you will be scheduled for an appointment. This appointment usually takes approximately one to one and half hours. You will be presented with a written report **detailing the results of your tests, the possible causes of your health problem and the recommended treatment protocol**. It is recommended that you have your spouse or a supportive family member attend this appointment.
8. Your treatment may consist of dietary and lifestyle changes as well as prescribed **Natural Pharmaceuticals**, which must be paid at the time of purchase.
9. Follow-up consultations will be scheduled every **3, 6 or 12 weeks** allowing you the opportunity to discuss your progress and any concerns with Dr. Carucci. Dr. Carucci will at this time determine what direction to take to help you continue your progress. Your cooperation in taking “**personal responsibility**” in your health care will go a long way in YOU getting better. Consultations can be conducted either by phone or in person (at the office). The fee for follow-up consultations is **\$80.00 for up to 20 minutes**. Any examination performed at follow-up appointments are subject to separate charges, i.e. BP monitoring, ABI monitoring, CasPro evaluation, spirometry, UA, etc.
10. **Abnormal laboratory tests** will need to be re-evaluated. The success of your treatment will not only be measured on the reduction of elimination of your physical symptoms, but on abnormal laboratory tests returning to a normal status.

For example: Many physicians will prescribe Lipitor for individuals suffering with high cholesterol. Your physician will also require periodic cholesterol blood tests to monitor the success of the medication. Laboratory fees can vary depending on what needs to be re-tested.

## THE PURPOSE FOR THIS RELEASE

You are hereby authorized to furnish and release to Dr. Gina M. Carucci all information from my medical, psychological, and other health records, with no limitation placed on history of illness or diagnostic or therapeutic information, including the furnishing of photocopies of all written documents pertinent thereto.

In addition to the above general authorization to release my protected health information, I further authorize release of the following information if it is contained in those records:

Alcohol or Drug Abuse:             Yes  No

Communicable disease related information, including AIDS or

ARC diagnosis and/or HIT or HTLA-III test results or treatment:     Yes  No

Genetic Testing                     Yes  No

*Note: With respect to drug and alcohol abuse treatment information, or records regarding communicable disease information, the information is from confidential records which are protected by State and Federal laws that prohibit disclosure with the specific written consent of the person to who they pertain, or as otherwise permitted by law. A general authorization for the release of the protected health information is not sufficient for this purpose.*

This authorization can be revoked in writing at any time except to the extent that disclosure made in good faith has already occurred in reliance on this authorization.

I hereby release Dr. Gina M. Carucci; any and all of his employees, agents managing members, and any of the attending physician(s) that I am requesting records of and/or from; from any and all legal responsibility or liability for the release of the above information to the extent authorized. A copy of this authorization shall be as valid as the original.

I understand that there may be a fee for this service depending on the number of pages photocopied. If such a fee is to be paid, it shall be paid by me, the requestor, and not Dr. Carucci. However; no such fee is usually charged if these records are requested for continuing medical care.

# Functional Diagnostic Medical Health Questionnaire

Please complete the following Functional Medical Health Questionnaire to the best of your ability. You may need family members to help supply information. Your thoroughness and accuracy in answering all appropriate questions will help Dr. Carucci evaluate the root cause of your health concerns and determine an effective treatment program.

**Note:** We are also interested in the so-called minor symptoms as well as the major problems. We know that in many doctor's offices there is some tendency not to mention too many symptoms for fear that the doctor will take you for a hypochondriac. The rules in our office are different. We are interested in any odd or unusual message you are getting from your body, even though it may be considered irrelevant to "making a diagnosis" or it may seem to you to be of no consequence to your health. Some such symptoms are useful clues in the kind of "medical detective work" we do. Please include as much information as you can on this form. If you need additional space, please use an extra sheet of paper and include it with these forms.

**Please print or write legibly.**

# ESTABLISHING HEALTH GOALS

## Personal Message

Before we begin our journey together, I would like to discuss something very important that will have a major impact on your ability to recover and achieve maximum improvement. After many years in private practice, I have had the opportunity to work with thousands of patients and have seen many patients achieve significant improvement while others have become frustrated and failed in their attempt to get well. After careful review, I have discovered the reasons why some people succeed and why others fail. This questionnaire is about much more than eliminating your symptoms – it’s about living a life of vibrant health.

I’ve discovered that any discussion of the correct way to achieve health and stay healthy is, in actuality; a discussion of how you have lived your life up to this point and how you will live it in the future.

Therefore, to help you make significant changes in your present health, I want to ask you a few very important questions. I want you to be honest with yourself and really dig deep inside yourself for the answers.

What do you hope to achieve in your visit with us? \_\_\_\_\_  
\_\_\_\_\_

If you had a magic wand and could erase three problems, what would they be?

- 1. \_\_\_\_\_
- 2. \_\_\_\_\_
- 3. \_\_\_\_\_

**Have you made the decision to change? To do what it takes to get well? Yes \_\_\_\_\_ No \_\_\_\_\_**

I have read something interesting: ***“The definition of insanity is to keep doing the same thing and yet expecting different results”***. If you keep following the same course of treatment you have been following will your results really change? Have you ever wondered if you are on the right path to achieving optimal health? Sometimes it requires taking a new and improved road to reach your destination.

Most people I ask tell me they’re made the decision to change. But how many people have truly decided to change? Very few! Why? Because there is a big difference between deciding to do something and having the “reasons” to actually do it.

When you have made a decision to make a change and you know your reasons, you create an internal power that can propel you to achieving health and wellness. So now I ask:

## ENVIRONMENTAL INFLUENCES

There are over 70,000 chemicals commercially produced in the United States. The long-term effects of many of these chemicals have never been investigated. But many chemicals are harmful in very low doses. Unless generated by the body (formaldehyde, pentane), the body's level for chemicals should be non-detectable, and not "low level". Chemicals are widespread in our environment, and constant exposure to low levels can cause dysfunction in many systems of the body. The purpose in the following questions is to determine if any of your health problems can be a result of chemical toxicity and to measure your **TOTAL TOXIN LOAD**.

### Electromagnetic Factors

- Live or have you lived within 200 yards from high-voltage wires or transformers?  
When? \_\_\_\_\_
- Live or have lived near an electric distribution substation

Thank you for taking the time to complete this health history medical questionnaire.

The information derived from all of these medical forms will provide invaluable data.

Each section builds upon the other, allowing me and other physicians the opportunity to discover the “**missing key**” that will solve your health problem.

Once all the sections of this form and the questionnaires have been filled out please return them to our office and we'll make an appointment for our initial consultation.

I thank you once again and look forward to helping you achieve a “**return to health and well being.**”

Please see the next page and go over the Patient Checklist.

Sincerely,

Gina M. Carucci, DC, MS, DICCP, DABCI
